PROFESSIONAL SUMMARY

I'm a highly motivated junior web developer committed to excellence. I'm actively seeking opportunities to apply my expertise in web development. I have a strong passion for creating outstanding web applications, such as the CMS, CRM & and some more projects, and I'm actively involved in advancing a "Point of Sale" software solution, among other significant projects. Currently, I hold dual roles as a web developer and web designer, bringing a well-rounded skillset to my work.

AREAS OF EXPERTISE

- ✓ **Front-End Development:** Proficient in crafting visually appealing and user-friendly frontend interfaces using HTML, CSS, and JavaScript. Skilled in responsive design and crossbrowser compatibility to ensure a seamless user experience

- ✓ **Web Design:** Experienced in creating captivating and intuitive web designs that enhance user engagement. Proficient in using design tools like Canva to produce eye-catching graphics and layouts.

- ✓ **Project Management:** Capable of effectively managing and coordinating web development projects from concept to completion. Skilled in task prioritization, time management, and collaboration to meet project milestones and deadlines.

- ✓ **Full-Stack Development:** Knowledgeable in both front-end and back-end development, with expertise in technologies such as Bootstrap, C#, Asp.Net MVC, and SQL Server. Able to build robust and scalable web applications.

- ✓ **Database Management:** Proficient in designing and maintaining databases using SQL Server, ensuring efficient data storage, retrieval, and management for web applications

- ✓ **Problem Solving:** Strong problem-solving skills and a proactive approach to troubleshooting issues, whether related to code, design, or functionality. Committed to finding innovative solutions to technical challenges.

- ✓ **Version Control:** Experienced in using version control systems like Git to manage code repositories, collaborate with team members, and track changes throughout the development process

- ✓ **Collaborative Team Player:** Able to work effectively in cross-functional teams, contributing technical expertise and creative insights to achieve project goals and deliver high-quality results.

MaveSys Infotech Pvt Ltd

Web Developer | 09 September 2022 - Present

In my capacity as a Web Developer at MaveSys Infotech Pvt Ltd, I leverage a robust skill set encompassing HTML, CSS, Bootstrap, JavaScript, jQuery, C#, MVC (Model-View-Controller), and SQL Server to engineer dynamic and high-performing solutions for our clients. I specialize in three critical areas:

- **Point of Sale (POS) Solutions:** My expertise in HTML, CSS, JavaScript, jQuery, and Angularjs is instrumental in the development and enhancement of POS software. This enables us to provide clients with seamless and feature-rich solutions that optimize their retail operations.
- **Customer Relationship Management (CRM):** I employ C# and MVC to develop customized CRM solutions, tailoring them to the unique needs of our clients. This empowers businesses to enhance customer interactions, streamline processes, and achieve their strategic objectives.
- **Content Management Systems (CMS):** Additionally, I work with HTML, CSS, and Bootstrap to build user-friendly content management systems. These systems empower clients to manage their digital content efficiently and keep their websites up-to-date.
- **Web Applications:** Leveraging HTML, CSS, JavaScript, C#, MVC, and SQL I contribute to the creation of web applications. These applications are designed to align with the organization's mission and deliver an exceptional user experience.

By applying these technologies judiciously, I ensure the creation of user-centric features and functionalities, facilitating user engagement and client success. Furthermore, my proficiency in SQL Server underpins data management and database optimization, ensuring robust and reliable backend support for our web applications.

As a Web Developer, I am dedicated to staying at the forefront of technology trends, continuously enhancing my skills, and employing these technologies innovatively to deliver top-notch web solutions for our valued clients.

WEBINK DIGITAL

Web Developer Intern| Feb 2022-Aug 2022

As a Web Developer Intern at Webink Digital, I played an integral role in building and maintaining websites for a diverse portfolio of clients, utilizing various online platforms. My responsibilities included:

- **Application Development:** Designed, developed, and rigorously tested applications to enhance website performance and user experience, resulting in improved client satisfaction.
- **Requirement Analysis:** Conducted comprehensive analysis of client requirements, meticulously gathering information, and conducting in-depth research to ensure precise project understanding.
- **Client Interaction:** Actively engaged with clients to ascertain their specific needs, provide expert advice, and offer creative solutions to meet their objectives. Collaborative Teamwork: Collaborated effectively with cross-functional teams, including designers and content creators, to seamlessly integrate various elements into website projects.
- **Quality Assurance:** Implemented rigorous quality assurance procedures to identify and rectify issues, ensuring the delivery of error-free websites to clients.

During this dynamic six-month internship, I honed my web development skills, gained invaluable hands-on experience, and contributed significantly to the success of numerous client projects. This internship not only expanded my technical expertise but also strengthened my ability to communicate effectively and work cohesively within a professional team environment.

PROJECT

Title: Online MYTRVLDIARY Website

Languages and Technologies Used: HTML, CSS, JavaScript, ReactJS, API Integration .

Project Purpose:

The Online MYTRVLDIARY Website was developed with the primary purpose of creating an efficient and user-friendly traveling management system. The goal was to provide customers with a seamless experience by offering a comprehensive set of services, including booking complete travel packages and easy communication with service providers.

Key Highlights:

- **User-Friendly Interface:** Designed an intuitive and visually appealing user interface using HTML, CSS, and ReactJS, ensuring a smooth and enjoyable user experience.
- **Travel Package Booking:** Implemented a feature that allows users to book complete travel packages directly through the website. This feature streamlines the booking process, making it convenient for travelers.
- **Efficient Management System:** Developed a robust backend system that efficiently manages travel bookings, customer data, and travel itineraries, ensuring seamless operations for both customers and administrators.
- **API Integration:** Integrated APIs to provide real-time information on travel destinations, weather updates, and local attractions. This feature enhances the overall travel experience by offering valuable information to users.
- **Contact Options:** Simplified communication by providing easy-to-use contact options. Users can reach out to customer support or service providers with ease, fostering better customer relationships.
- **Responsive Design:** Ensured that the website is fully responsive, adapting to various screen sizes and devices, guaranteeing accessibility to a wide range of users.
- **Interactive Features:** Incorporated interactive elements and animations to engage users and make the website more visually appealing.
- **Scalability:** Designed the website with scalability in mind, allowing for future enhancements and the addition of new features as the business expands

Project Link:

The Online MYTRVLDIARY Website can be accessed at the following link:

https://nikhilsaxena16.github.io/TRAVEL_DIARIES/

This project showcases my proficiency in web development, including front-end design, backend functionality, API integration, and user experience optimization. It demonstrates my ability to create practical solutions that improve business processes and enhance user satisfaction in the travel industry.
